

## InviSense application privacy policy

### Information collected by the application

The InviSense application only collects data which is created by using the InviSense scanner. The InviSense application does not collect any personal or other data from the user's device.

The following data is collected from the use together with our scanner:

- Time and date of measurement
- Sensor ID
- Measurement value

### How the information is used

The data collected is stored in the InviSense Cloud when the user chooses to upload the information. This helps the user to keep track of previous measurements.

The data may also be used in an aggregated format to conduct analyses based on the measurement data.

### Information sharing

Information collected by the application will only be shared in an aggregated and anonymous format.
